

TMAX™ MECHANIC TRUCKS ★

RUGGED & RELIABLE

Stellar® Mechanic Trucks Offer Higher Payload

INDUSTRY- LEADING

WORK TRUCKS & EQUIPMENT

TMAX™ Mechanic Trucks have a well-earned reputation for quality performance. They're built to handle the toughest conditions and offer years of worry-free performance. Aluminum models are lighter weight for increased overall payload and added corrosion resistance. Steel models also available.

BUILT FOR MORE

Popular TMAX Aluminum Mechanic Trucks have been updated with next-level innovations. From infinite shelving possibilities and improved wiring access with pass-through slots to high-intensity lights with integrated strobes and a cascading turn signal, every model offers enhanced efficiency and ease of use.

THE CONFIGURATION YOU WANT

In addition to the varying sizes and model types, you can have your truck optimized to best fit your needs. Choose from different storage compartment configurations as well as add accessories like a service crane, air compressor, lube skid, toolbox system, power supply and more. Aluminum models feature an exclusive extruded aluminum top with two drill-free mounting rails for quick installation of accessories.

THE QUALITY YOU NEED

Uptime is everything, and Stellar Mechanic Trucks are built to get the job done day in and day out. It starts with high-quality materials and precision construction, including stainless steel billet-style hinges for years of heavy use. Engineering features also ensure long-term performance, such as Stellar's torq-isolator crane support design that transfers lifting stresses to the stabilizers and box-type subframe, not the compartment doors.
